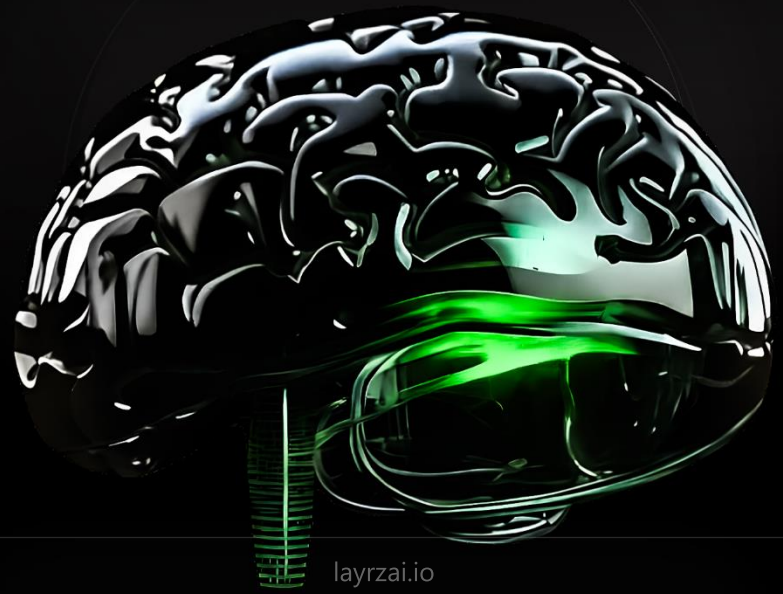
The First AI-Powered IDE & Tool Suite For Web3 Builder

Developed So You Don't Have To



Introduction

Layrzai.Io Is An AI - Driven IDE Platform Simplifying Smart Contract Development & Deployment.

We Empower Builders To Create, Deploy, & Manage Blockchain Projects Effortlessly With AI Agents And Telegram-integrated Bots,

Reducing Time & Cost Drastically

©layrzai.io

Problem

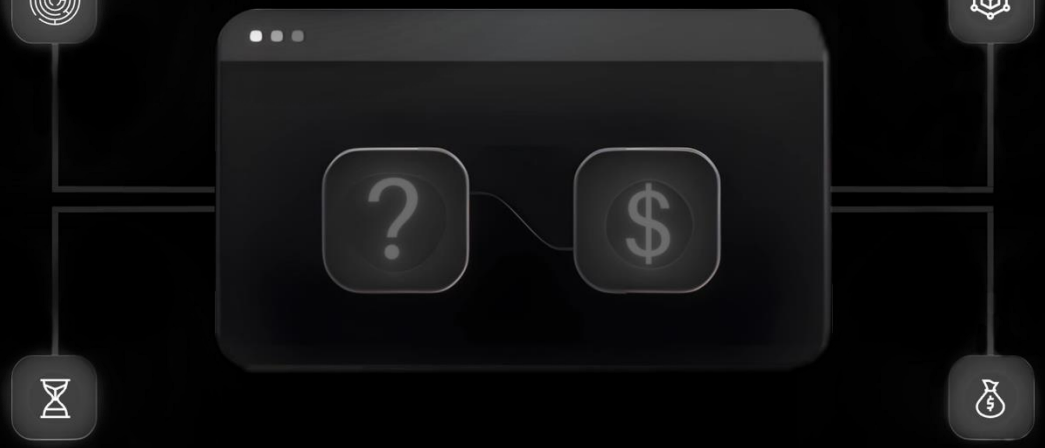
Current Smart Contract Development Is

Complex

Requires Solidity expertise.

Fragmented

No unified platform for smart contracts + DApps + Web3 tools.



Time-Consuming

Weeks to launch.

Expensive

Devs charge $5K–$20K per project.

Mainstream Adoption Blocked By Technical Barriers.

©layrzai.io

Solution

Layrzai.Io AI Powered IDE & Bot Suite

An Intuitive Platform Enabling Anyone To Create, Deploy & Manage Web3 Applications With Ease.

AI Writes Solidity Contracts & Edits Functions In Real Time

One-Click Deployment

Integrated Telegram Bots For Automation

No Coding Required For Dapps & Web3 Sites

©layrzai.io

Market Valuation

Global Low-Code/No-Code market: $47B by 2028

Crypto/Web3 Developer Tools market: Growing exponentially

Comparison:

Shopify	Wix / Wordpress	Layrzai.io	Target users	Potential
democratized e-commerce	democratized website building	democratizing Web3 Development	Crypto startups, token projects, DeFi protocols, DAOs, NFT creators, dev agencies.	Just 1% of this market share would position LayrzAI at 470m MCAP

©layrzai.io

Products: AI IDE (Overview)

AI Solidity IDE: Write contracts via AI prompts

Multi-chain support: ETH, BSC, BASE, SOL

One-Click Deployment

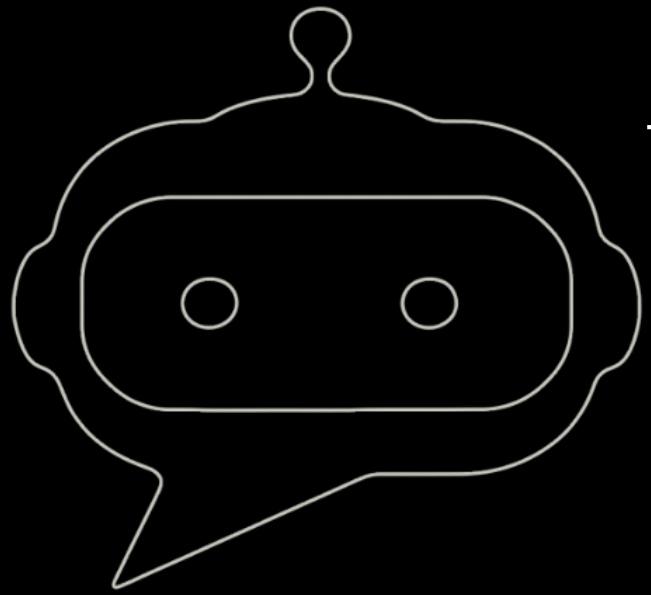
- Live Code Preview & Audits
- Integrated Dapp UI builder

©layrzai.io

Products: AI IDE (In-Depth)

21B parameter AI model trained on Solidity best practices

Prebuilt contract templates: Tokens, Complex stealth functions, staking, governance



Auto-documentation for docs & verification on scans

Advanced security checks & simulations

©layrzai.io

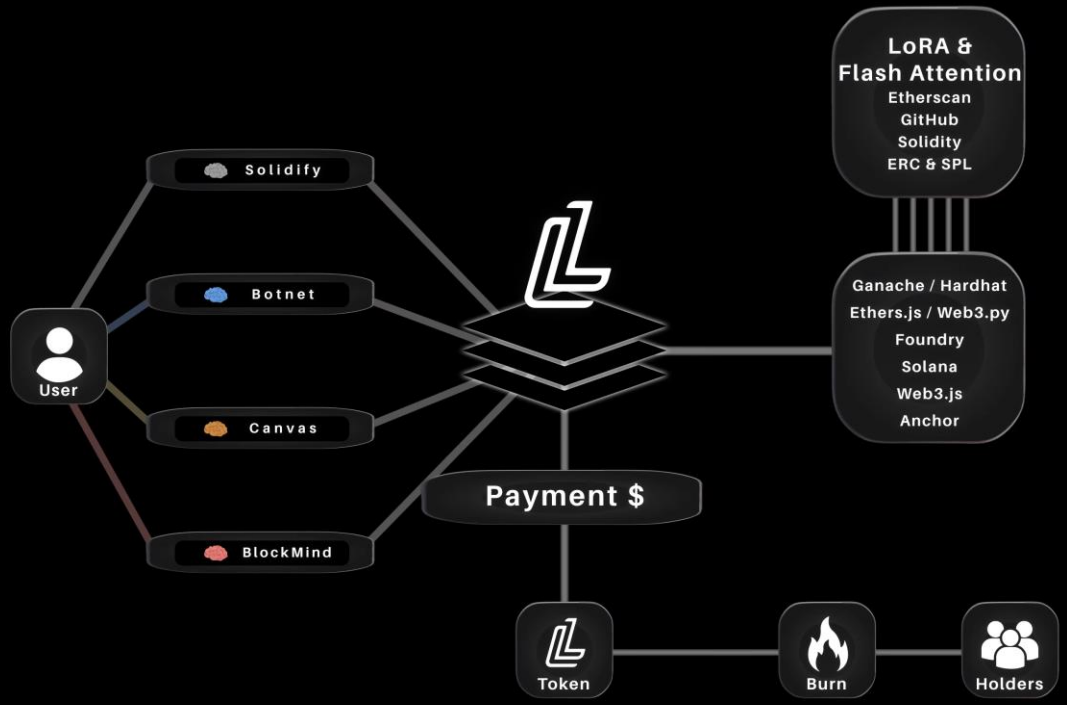
Products: AI IDE Technical Framework

AI Architecture: LLM + CodeGen fine-tuned for Solidity

Real-time error handling & optimization

Built-in backend node integration

Customizable prompts & modular architecture



©layrzai.io

Products: Contract Deployer Bot

Telegram bot for automated smart contract deployment

Supports:

Token launch, staking contracts, liquidity locks

No dev required:

Guided AI prompts

Instant deployment & verification.

©layrzai.io

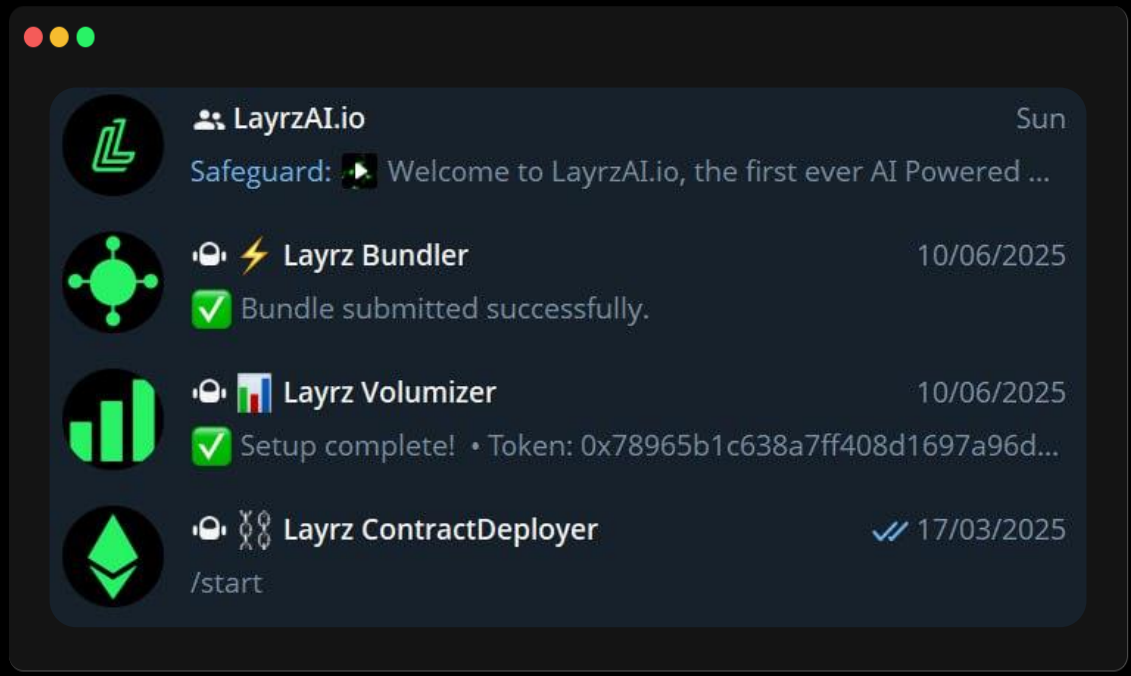
Products: Volume Bot

Telegram bot to generate token volume

Simulates organic trading activity

Enhances token visibility & holder engagement

Plug & play with existing tokens



©layrzai.io

Products: Bundle Bot

01

Liquidity bundler for multi-wallet trading

02

Aggregates buys/sells for stealth launches

03

Supports front-running protection

04

Optimizes liquidity pool management.

©layrzai.io

Tokenomics

Total Supply: 10 million tokens

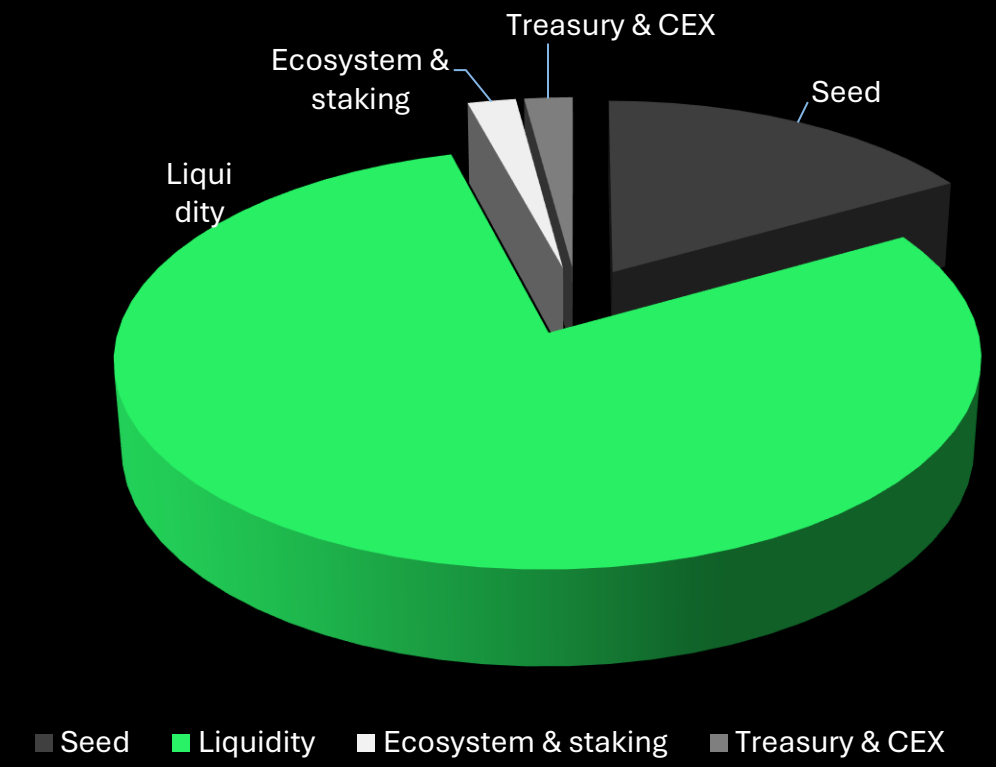
Token Utility: Payment for Subscriptions & Services (Burn / Deflationary) , Revenue share

IDE access & premium features (Must hold $LRZ)

Transaction fees in bots payment (Payment only in $LRZ closed system no stable or eth payments)

Governance & staking

Allocation:



©layrzai.io

Seed Round

Raising 32e for Launch & Growth

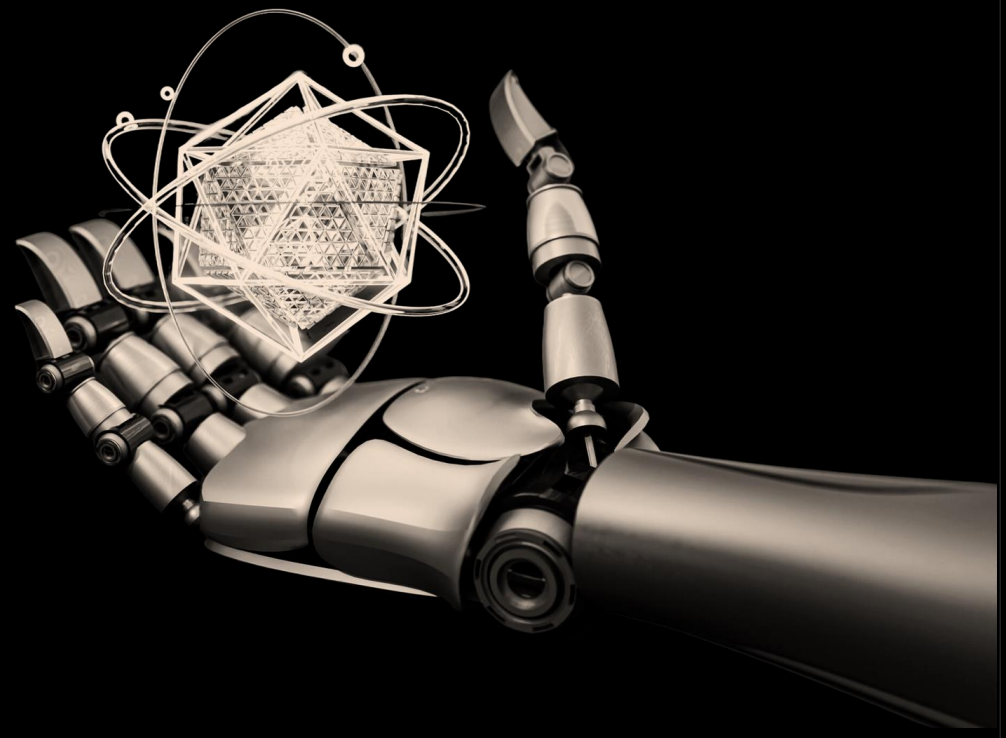
Rate as follows:

KOL & Advisor (Limited rate): 0.8%
Per 1e = 18E raised

Public: 0.4% per 1e = 15E raised

Liquidity provision: 26E

Volume bots: 5E



©layrzai.io

Seed Round

Investor Benefits:
Early access to beta testing on all future products
Premium bot usage free for Life linked to seed wallets

Revenue share model
Sub launch entries value:

KOL: $257k entry (At time of writing concordant with ETH value)

PUBLIC: $520k

1st CANDLE including team bundle buys = 1.5 - 2m conservative estimate
